Valerio Evangelista

Junior Backend Developer · Java / Spring Boot

Rome me@valeva.dev github.com/Ryhaza linkedin.com/in/valerio-evangelista

Available immediately, on site, hybrid or remote

Profile

Java backend developer, in year 3 of a Computer Engineering degree. I came to development from a driving school, where I ran a branch from 2023 to 2025. I took a web application for an external client into production, from the requirements to the release, and built a management system in Spring Boot on a modular architecture.

Technical skills

Languages	Java, SQL
Backend	Spring Boot, Spring Security, Spring Data JPA, Spring Modulith, Hibernate/JPA, JWT
Data and testing	PostgreSQL, Flyway, JUnit 5
Tools	Git, Maven, Docker, IntelliJ IDEA, Postman, OpenAPI, Claude Code
Frontend	Next.js, React, Tailwind CSS, Payload CMS

Experience

Full-stack developer

ECP Fabricamente, Rome — March–October 2026

- Designed and built on my own the web application of a university guidance centre, in production: the site with the course catalogue and the CMS, Next.js and Payload on PostgreSQL.
- Built the CRM for sales contacts, with automated emails and push notifications.
- Managed the relationship with the client on my own, from the requirements to the release. Reference available.

Driving instructor and theory teacher

Driving school, Rome — January 2023–September 2025

- Ran a three-person branch on my own: lesson planning, exams, relations with students and families.
- About 150 students a year, with over 90% passing the exam. First commercial contact with prospective clients.

Projects

Driving school management system

`Java 21 · Spring Boot 3.5 · Spring Modulith · PostgreSQL`

A modular monolith on Spring Modulith serving several driving schools from one installation, with module boundaries checked by tests.

- Four domain roles - administration, office staff, instructor, student - with Spring Security and JWT authorisation. A domain taken from the sector I worked in.
- Rate limiting, caching, audit log, OpenAPI, Flyway migrations. Integration tests on a real PostgreSQL, not on mocks.

Travel agency management system

`Java 25 · Spring Boot 3.5 · Spring Security · Spring Data JPA · MariaDB`

A Spring Boot app on MariaDB that started as a console and grew a web interface, with session login and BCrypt, PayPal payments and PDF tickets with QR codes.

Education

Bachelor's degree in Computer Engineering (L-8)

Universitas Mercatorum — `In progress, year 3`

Higher technician, software developer (EQF level 5)

ITS Academy Lazio Digital — `In progress`

Electronics and electrical engineering technician

ITI Pacinotti-Archimede, Rome — `2019`

Languages

Italian	native
English	C1

Certificates

Cambridge English: C1 Advanced (CAE) — `2019`

I authorise the processing of my personal data under Regulation (EU) 2016/679 (GDPR) and Italian Legislative Decree 196/2003.
